

EXTRAORDINARY EXPERIENCES, NATURE

Modrá Living Water

Modrá 233

Modrá , 68706

Learn about life under the water. In the freshwater and botanical grounds you can admire nature at close range. See fish, aquatic animals and plants typical of the Morava River ecosystem, and its adjacent streams and pools, all through a glass tunnel. In the outdoor area you walk through a richly planted green area. You can find typical Moravian biotopes with their characteristic herbs and woody plants (such as the Chřiby springs, a rural herb garden or the Moravian riparian forest).

The area also includes a wooden footbridge over a paddock with majestic aurochs, the ancestors of today's cattle breeds.
